

Habitat Project Priorities of the Playa Lakes Joint Venture

The Playa Lakes Joint Venture (PLJV) will only consider habitat project proposals that address the priorities below and the PLJV mission, which is to conserve playas, other wetlands and associated landscapes through partnerships for the benefit of birds, other wildlife and people in the PLJV region.

- Projects that demonstrate a clear link between PLJV planning as found in the Area Implementation Plans and on-the-ground habitat delivery.
- Projects that demonstrate a watershed-based approach wherein wetlands habitats, upland habitats and the needs of a diversity of bird species are integrated into a comprehensive project design and management plan.
- Projects that specifically attempt to improve the carrying capacity of important habitats for priority bird species as demonstrated through the HABS database.
